SKILLS

- | | |
|------------------------------|---|
| • Languages: | Python, Java, C++, SQL, C, DBMS |
| • Data Analytics: | Pandas, NumPy, Exploratory Data Analysis (EDA), Data Preprocessing, Data Cleaning |
| • Data Visualization: | Power BI, Tableau, Streamlit, Microsoft Excel, Matplotlib, Seaborn, Scikit-learn |
| • Soft Skills: | Problem-solving, Time Management, Adaptability, Team Collaboration |

PROJECTS

Digital Payment Fraud Detection Dashboard

Jul' 26

- Tech Stack:** Power BI, DAX, Power Query
- Designed an interactive Power BI dashboard analyzing 7,500+ digital transaction records across Indian cities to identify suspicious fraud patterns.
 - Built automated ETL workflows in Power Query, resolving data anomalies while tracking IP risk scores, account age, and failed login attempts.
 - Automated fraud monitoring by creating custom DAX measures and dynamic KPI telemetry cards across payment methods (UPI, Cards, NetBanking).

AI Dropout Risk Intelligence System

Jun' 26

- Tech Stack:** Python, Scikit-learn, Streamlit, Pandas
- Engineered an end-to-end machine learning predictive system using Python and Scikit-learn to classify student dropout risks with real-time probability scoring.
 - Integrated Explainable AI (XAI) feature importance and dynamic SVG risk gauges to diagnose primary academic risk drivers across attendance, marks, and assignments.
 - Developed an interactive Streamlit analytics platform featuring institutional cohort batch monitoring, automated critical danger alerts, and prescriptive interventions.

Crime Against Women in India — Analysis & Prediction

May' 26

- Tech Stack:** Python, Scikit-learn, Pandas
- Developed a predictive regression model in Python and Scikit-learn to analyze district-level crime trends across Indian states and forecast crime rates accurately.
 - Executed end-to-end data preprocessing on multi-factor datasets using Pandas and NumPy, including outlier removal, missing value imputation, and feature scaling.
 - Trained a Scikit-learn Linear Regression model using 7 crime factors to predict crime rates and generated visual charts (heatmaps, boxplots) to highlight high-risk areas.

TRAINING

Centre for Professional Enhancement, LPU

Jun' 26 – Jul' 26

- Data Analytics Essentials (SQL, Python, Power BI, Tableau, Excel)
- Extracted, cleaned, and manipulated complex relational datasets by writing optimized SQL queries (joins, aggregations) and Python automation scripts.
 - Applied statistical methods and exploratory data analysis (EDA) using Pandas, NumPy, and Excel to uncover actionable business insights.
 - Built interactive Power BI and Tableau dashboards with custom DAX measures and KPI models, earning a Grade 'A' Certificate of Merit.

CERTIFICATIONS

- | | |
|--|---------|
| • Data Analytics Essentials with AI Lovely Professional University (Grade 'A') | Aug' 26 |
| • Database Management System Part - 2 Infosys Springboard | Jul' 26 |
| • Programming in JAVA iamneo — An NIIT Venture | May' 26 |
| • Programming Using C++ Infosys Springboard | Aug' 25 |

EDUCATION

- | | |
|---|--|
| • Lovely Professional University
B.Tech Computer Science and Engineering | Phagwara, Punjab
Aug' 24 – Present |
| • S.S.I.S. International School(RBSE)
Intermediate Percentage: 82.2% | Jaipur, Rajasthan
Jun '22 – Mar '23 |
| • Shalom English Secondary School
Matriculation Percentage: 88.83% | Alwar, Rajasthan
Jun '20 – Mar '21 |
